

Risk	Probability	Degree of severity	Consequences	Retirement plan
Illness/Absence caused by external factors	Moderate	Serious	Affected individual is unable to complete their tasks	Participant's tasks must be carried out by other participants
Late discovery of errors	High	Tolerable	Development slows down or halts	Backtrack to the error's origin and correct affected areas
A task takes longer than expected	Moderate	Tolerable	Results in more work than expected and possibly delayed progress	Alter the project plan, distribute tasks to participants
Technical difficulties	Low	Serious	Planned solution is possibly invalidated	Fix the technical issue or use another solution
The project is halted due to lack of knowledge	Low	Tolerable	Participant does not have the required knowledge to complete a task	Attempt to learn from team members, read up on subject material
Loss of group members	Low	Critical	Activities are left without supervisor	Divide tasks amongst remaining participants
Internal disagreements	Low	Tolerable	Time is spent on discussions rather than development	Maintain democracy and motivational levels
Change in specifications	Low	Tolerable	Both planned and implemented solutions are invalidated	Discuss changes with student/teaching assistant
